

Approved List of Evaluation Services for International Student Transcripts

Alderson Broaddus absolutely requires any applicant submitting a transcript from a college to have it professionally evaluated by a third party. Just about every college has this rule. **You will not be awarded college credit for courses taken at a college outside the United States without this evaluation!** You may be required to submit an evaluation of secondary school transcripts at our request. Below is a list of third-party agencies Alderson Broaddus University has approved to evaluate international student transcripts. The student must contract with the evaluator himself/herself at the student's cost. There is no provider here preferred over the others. When consulting with an agent be sure to get the price for English translation if necessary, course-by-course, accreditation, and US grade equivalence.
